ABOUT ME

Software engineer at MIP Holdings with 3+ years of experience using among other expertise Progress 4GL, JavaScript, and HTML5 to maintain and develop a system that helps clients automate and manage their financial administration needs.

SKILLS

- JavaScript
- MongoDB with Mongoose
- NodeJS with Express
- Agile/Scrum methodology
- Progress 4GL
- RESTful API
- ReactJS
- HTML/CSS

TOOLS

- NPM
- Git
- Jira

EXPERIENCE

Software Engineer
MIP Holdings/Johannesburg/2019-

- Through collaboration developed a dynamic user interface that allowed users to do dealings on the JSE for various trusts in the system.
- Developed reports using Jasper reporting which integrated with our communications module to distribute to relevant users based on their roles within the system.
- Made enhancements to client workflows which allowed more activities to be automated for the users improving data processing turnaround time.
- Developed jobs using job manager to automate trivial tasks which would otherwise require a lot of man-hours from the client daily.
- Developed data imports which allowed the client to migrate large sets of data into the system with added validation to maintain data integrity.

EDUCATION

BSc in Computer Science
Wits University
2013 - 2016
